ABOUT

I am a professional in the field of information technology with experience in software development. Since starting my career in the IT world, I have been involved in various projects that help companies and clients improve operational efficiency through technology-driven solutions. I am passionate about continuous learning and personal development, and I aim to contribute my best to every project I work on. With over 4+ years of experience, I possess skills in project management, software development, and implementing innovative technology solutions.

EXPERIENCE

Portfolio: farhanabdulghn.github.io/hansfolio

Kabayan Consulting

Mobile Developer (Aug 2026 – Present)

- Developing and maintaining high-quality mobile applications using Flutter, delivering clean and scalable code for cross-platform (Android & iOS) products.
- Translating business requirements and UI/UX designs into responsive, performant mobile features.
- Integrating applications with REST APIs, third-party services, and backend systems to support core business functionality.
- Applying modern state management and clean architecture practices to keep the codebase maintainable and testable.
- Collaborating closely with cross-functional teams, including designers, backend engineers, and stakeholders, to deliver reliable, production-ready applications on schedule.
- Participating in code reviews, debugging, and performance optimization to ensure a smooth, high-quality user experience.

PT. Aesthetic Teknologi Indonesia — Bandung, Indonesia

Mobile Developer (Aug 2023 – Jul 2026)

- Developing and maintaining Flutter-based mobile applications, including customer service and membership platforms.
- Building customer-facing features such as product ordering, service booking, digital queue numbers, and location tracking.
- Implementing real-time notifications and digital membership card functionality within an integrated platform.
- Maintaining and updating the application, including integration with Firebase for backend services.
- Managing application deployment and updates to the Google Play Store and Apple App Store.
- Testing applications to ensure quality, stability, and a smooth user experience before release.
- Assisting in designing application architecture and planning new features together with the team.
- Collaborating with cross-functional teams to deliver production-ready mobile applications.

PT. Ruang Konsul Indonesia

Mobile Developer (Jan 2023 – Aug 2023)

- Developed Flutter-based mobile applications supporting business operations.
- Integrated mobile applications with REST APIs and backend services.
- Contributed to feature development, testing, and bug fixing across the app lifecycle.

PT. Bejana Investidata Globalindo

Intern Full-stack Developer (Aug 2022 – Dec 2022)

- Assisted in developing and maintaining both frontend and backend components of internal applications.
- Worked with the development team on feature implementation, testing, and debugging.
- Gained hands-on experience with full-stack development workflows and version control (Git).

SELECTED PROJECTS

- **Quran Al Barkah** — A digital Quran application with translations, audio recitations, prayer times, and Qibla direction. Published on Google Play Store.
- **AESLINE DISPLAY** — A digital queue management application for Android/Google TV with real-time queue numbers, automated audio call announcements, and YouTube/local content playback. Published on Google Play Store.
- **QR Guest Book** — A QR-based digital guest book application supporting check-in via QR scan or manual entry, with guest data printing for documentation.
- **Benings App** — A business application to manage Purchase Orders, Sales Orders, Delivery Orders, and shipment tracking in one integrated system.
- **Aestech Customer** — A customer service application for product ordering, service booking, digital queue numbers, location tracking, digital membership cards, and real-time notifications.

EDUCATION

Politeknik LP3I Bandung (Aug 2020 – Dec 2023)

Diploma (D3) - Information Management

Final Year Project: Amelia Foodcourt (Mar 2022 – Sep 2022)

Android Developer (Kotlin)

- Developed **Amelia Foodcourt**, an online food ordering application, as a final-year project.
- Built the Android application using **Kotlin**, applying Android components and object-oriented programming (OOP) principles.
- Integrated the application with **Firebase** as the backend for data storage, authentication, and real-time order management.
- Implemented API integration to connect application features with backend services.
- Presented and completed the project in September 2022.

SKILLS

Technical Skills:

- Flutter, Dart, Vue.js, JavaScript, HTML & CSS, PHP
- Kotlin, Android SDK, Android Studio (academic project experience)
- REST APIs, Firebase, Git
- Clean Architecture, BLoC, Riverpod
- Responsive UI development, vue-i18n (bilingual apps)

Soft Skills:

- Project Management, Problem Solving, Collaboration
- Continuous Learning, Attention to Detail

LICENSES & CERTIFICATIONS

- Engineering Professional Development Award — Aestech (Jul 2026)
- Claude Vibe Coding — tixu.ai (Jul 2026)
- Claude Advanced Workflows — tixu.ai (Jul 2026)
- Claude Certification — tixu.ai (Jul 2026)
